David,

Hope this finds you well!

I have a need to secure a drawing for a Vulcan gas cooking lineup and Jim Sherman with Vulcan said you're still in that business. Attached is a sketch from Dylan Miller (selling dealer) as well as a copy of their quote. All pieces are natural gas.

To confirm, here are the additional details I think you'll need to complete the drawing:

1. The entirety of the items sketched are all curb mounted and all items will be included with the 3" toe curb option from Vulcan. The exception is the stand alone broiler with the wood assist base. That unit will have a custom fabricated base by a local fabricator.
2. Starting from the left, the two 6 burner ranges and griddle top range have a front manifold connection at the left and cap/cover on the right side of the griddle range (three ranges interconnected). Those three pieces have a common 8" front ledge as well. All have a stub back and all have convection oven bases (can you show the length and location of the standard cord and plug for each?).
3. The broiler and stand alone 6-burner range sketched are both rear gas, also curb mount and the range is the same configuration as the first three (except rear gas).
4. The other Vulcan items on the quote via the link below are free standing in other areas of the kitchen with the same specs, legs not curb mount, rear gas, stub back, etc.

Thanks in advance for your help. As soon as we get a drawing, we should secure an order.
