Hi David,

Any chance you could get this package done by end of the day tomorrow? I am still waiting for engineering to get back to me about Hohokam.

Thanks!,
Jill

Subject: New 4-Series Design Request - Blooming Grove ISD (Tonjes) - Due 6/23 or Sooner

Design Team,

Here is a new request that I think is mostly complete in concept. We want to show all four units in a line. The two hot units are standard units with some modified tray slide heights and then the frost tops have a left and right hand version with low profile breath guard over the frost top only.

I thought this might be something that could be done completely in concept but sales was more confident in you guys doing it since it is "likely to be an order". Concept number is C-12523. If it can be done completely in concept and someone wants to walk Steve through that I am open to that as well, just keep me in the loop if it goes that route
