Good morning Dave,

How are you? We are working on a project for one of our consultant groups. Please provide a preliminary drawing for 2 pieces of HD range equipment. The items are V4B36C and V2B18B. The convection oven base unit will be left and the 2 burner will be right. I've attached the specs.

Let me know if you have any questions.

Thank you,

Rick Lisby

Subject: Fwd: Vulcan Question
To: Squier Quotes <squierquotes@squierinc.com>, Alan Squier <asquier@squierinc.com>

Please see below for Kelsey at Culinary Advisors. Please quote the following:

1/each V4B36C, nat gas, cap and cover left, rear gas, 1" pressure regulator, 1/each V2B18B, cap and cover right, no rear gas, 54" overlapping front rail, 54" overlapping flow-thru shelf, casters for both.

Please have David Bethel produce a drawing. Let him know that the convection oven base unit will be left and the 2 burner will be right.

Thank you!
