Customer are on outside Flip those utilities (1 should have doors 1 shouldn't )

Add bg to 74" unit

Subject: Series 4 - Hein - UPMC - DUE

Need correct layout per sketch and:

1. Lineup needs to show the U-shaped equipment with the center unit having the drop-ins then the corner stations on each side. Then utilities.
2. Utility stations will need to be changed to reflect the 36" breath guards – operator right unit as the operator is facing to have the b.g. situated at operator left of utility station and open counter

on right. This unit to have the 2 grommet holes for induction cooking and the duplex receptacle and open storage.

3. Other utility station in the lineup to have the 36" b.g. to be on operator right of the of the utility station and to have the storage with doors.
4. To review the UPMC Williamsport Quote, Click here: < <https://review.aq-fes.com/quote/6vjqQTKd> >
