

Subject: Drawing Request (by COB 5/20/22) - World Bank I Bldg (FDS Design Studio)
From: Barb Alger <balger@squierinc.com>
Date: 5/17/2022, 3:24 PM
To: David Bethel <ddb@davidbethel.com>

Hello David,

The consultant has asked for a drawing for the Vulcan pieces they are specifying on this project. The challenge is they used the same Item numbers for two configurations where the integrated pieces are not identical. You will see in my quote (attached) I had to identify them by adding either .1 or .2 to the items. In short, this is what we would like to see:

CONFIG 1: Items 27 and 28 integrated into Item 29

Item 27: VG24 on the RIGHT (manifold)

Item 28: VCBB24 on the LEFT (gas coming in)

Item 29: VSC48 (compressor left)

CONFIG 2: Items 27 and 28 integrated into Item 29

Item 27: VG24 on the LEFT (manifold)

Item 28: VCBB24 on the RIGHT (gas coming in)

Item 29: VSC48 (compressor left)

CONFIG 3: Items 30 and 31 manifolded

Item 30: V6B36S on LEFT (gas coming in)

Item 31: V2B12B on RIGHT (manifold)

FREESTANDING: Item 32 - VC55GD

If you have any questions or need anything else, please let me know. Please have the drawing back to us by COB 5/20/22 or sooner.

Thank you.
