David,

Sorry about that here is the quote updated to have the item numbers match what is on the customer drawings. I am not sure where I got mixed up but this should be correct now. Let me know if you have any questions

Morning Anthony, Just a follow up. I'm having difficulties matching the quote with the drawings. Can you give me a call when get a minute.

Regards -David

Hi David,

Here is a request for some new drawings for an order for Zumbrota Mazeppa. I attached my quote and a .pdf of the place for your reference.

The breath guards go on the units, these should be pretty straightforward but let me know if you have any questions

Hi David,

Sorry I just reviewed this.

Please change all of the tray slides that are showed and called out as corian to be stainless steel. Update the drawings but please make sure the notes get changed as well. They will still be the exact same size and will not have rub strips so it will almost be like a plate rest.

Everything else looks good. Thank you – sorry about the delay in review
